

Scope: Provision of foreign trade services, customs clearance, warehousing, sea, road, air, and intermodal (rail) logistics operations, as well as inland and international delivery services.

1. Policy Statement

Apron Global Logistics is firmly committed to conducting its operations with a deep respect for environmental sustainability. We recognize the importance of protecting the environment and aim to minimize our ecological footprint. This Environmental Policy outlines our commitment to conservation and defines the principles and objectives that guide our environmental management efforts.

2. Legal Compliance

We pledge full compliance with all applicable environmental laws, regulations, and standards across all regions in which we operate. We continuously review our practices to ensure compliance, and where feasible, we aim to exceed the minimum legal environmental requirements.

3. Environmental Management System (EMS)

We are dedicated to establishing and maintaining a robust Environmental Management System (EMS) designed to address our environmental impacts responsibly. The EMS includes:

- a. Environmental Goals and Metrics: Defining measurable targets to increase efficiency and reduce environmental impact.
- b. Risk Evaluation and Mitigation: Identifying environmental risks related to our operations and taking proactive steps to mitigate them.
- c. Employee Training and Awareness: Enhancing environmental awareness through training and promoting active involvement in environmental initiatives.
- d. Resource Efficiency: Promoting efficient use of energy, water, and materials by integrating effective technologies and processes.
- e. Waste Management Strategies: Applying practices to reduce, reuse, and responsibly dispose of waste materials.
- f. Pollution Prevention Measures: Managing hazardous substances and minimizing air and water pollution through preventive strategies.
- g. Continuous Improvement: Regularly assessing our environmental performance to identify and act upon opportunities for improvement.

4. Sustainable Supply Chain Engagement

We collaborate with our suppliers to promote environmentally responsible practices throughout our supply chain. We encourage compliance with environmental regulations and the adoption of eco-friendly technologies and processes.

5. Stakeholder Engagement and Transparency

We commit to transparent engagement with stakeholders on environmental matters. Our efforts include:

- a. Considering stakeholder input on environmental concerns and addressing their expectations,
- b. Communicating our policies, objectives, and achievements to employees, clients, suppliers, and the public,
- c. Responding promptly and openly to questions and concerns regarding our environmental practices.

6. Performance Monitoring and Reporting

We implement systems to monitor and communicate environmental performance effectively:

- a. Key environmental indicators are continuously tracked against set objectives,
- b. Annual sustainability reports are published and shared with stakeholders,
- c. Regular internal audits assess compliance with this policy and identify areas for development.

7. Policy Review

This policy is subject to periodic review to ensure it remains relevant, effective, and aligned with technological advances, regulatory developments, and global best practices.
